## **BOOK REVIEW**

### The birds of South-east Queensland

by Gregory J. Roberts

A comprehensive booklet on the birds of south-eastern Queensland has just been published by the Queensland Conservation Council. A total of 427 bird species for the area makes it the richest avifaunal region in relation to size in Australia. I found the text accurate and informative and at \$1.80 plus

35 cents postage it is an absolute steal. Copies may be ordered from the Queensland Conservation Council, P.O. Box 238, NORTH QUAY, QLD., 4000.
